

# Dublin Pride - 40 Years Of Community

I enjoy staying in Dublin and am very proud of being a resident of this town because it has a wonderful community.

The people in this city are very friendly and cooperative.

The city is very clean, has new amenities to use, and has beautiful parks. I like the resources offered by the city such as the public library and public transportation.

I love to read books and regularly visit the library to gain knowledge. Our city is very safe with low crime rates and has a good public transportation system that people can use and in turn help the climate by reducing pollution.

I would like to take part in cleaning services offered in the pride week to help the city environment. I also plan to donate food cans to the food bank to help the needy people.

(contd.)

I like helping my dad plant trees and plants in the backyard, and I like to water them and see them grow. We help mother earth by regularly separating garbage, green waste, and recyclables and putting them in their own cans. We have also put solar panels in our house which will generate solar energy and we have an electric vehicle which will reduce pollution.

I love to see how people come together from different places on the globe and build a strong community in the city of Dublin. I love the city of Dublin - my Home!
